

Remote & Hybrid Work Policy

Document Ref: HR-POL-003 | Effective: March 2026

TechV-Flash is committed to providing flexibility while maintaining high levels of collaboration and productivity. This policy defines the operating guidelines for on-site, hybrid, and fully remote work models.

1. Work Models & Eligibility

1.1 Hybrid Model (Default)

The standard operating model for TechV-Flash employees based within a 50km radius of the Pune HQ is Hybrid. Employees are required to work from the office a minimum of 3 days per week. Tuesdays and Thursdays are mandatory "Anchor Days" for in-person collaboration.

1.2 Fully Remote Model

Employees residing outside the 50km radius of a TechV-Flash office may be classified as Fully Remote. This status requires approval from the Department Head and HR. Remote employees must overlap at least 4 hours with the standard IST working day.

1.3 Interns and Probationary Employees

Interns and full-time employees in their 90-day probationary period are required to be on-site 5 days a week to facilitate onboarding, training, and integration, unless explicit written exemption is provided by the CEO, Neeraj Mayekar.

2. Work-From-Anywhere (WFA) Allowance

To support global mobility, Hybrid employees are granted a "Work-From-Anywhere" allowance. This permits employees to work fully remotely from any domestic or international location for up to **30 calendar days per year**, subject to manager approval.

Tax & Compliance Warning: WFA requests exceeding 30 days or involving international relocation must be reviewed by the Legal & Compliance team to avoid creating permanent establishment or unexpected tax liabilities for the company.

3. Equipment & Setup Stipend

Classification	Hardware Provided	One-time WFH Stipend	Monthly Internet Allowance
Hybrid	Laptop, Charger, Headset	15,000 INR	1,000 INR
Fully Remote	Laptop, Dual Monitors, Headset	30,000 INR	2,000 INR

**Stipends are subject to expense submission and must be utilized within the first 60 days of employment or status change.*

4. Security & Confidentiality

4.1 Secure Networks

Employees working remotely must connect through a secure, password-protected Wi-Fi network. Accessing company systems via public, unsecured Wi-Fi (e.g., cafes, airports) is strictly prohibited unless connected through the official TechV-Flash VPN.

4.2 Physical Workspace Security

Remote workstations must ensure visual privacy. Employees must lock their screens when stepping away and ensure unauthorized individuals (including family members) cannot view confidential company or client data.

5. Workspace Ergonomics & Health

5.1 Furniture & Layout Standards

To maintain long-term physical health, employees are advised to configure a dedicated workspace with an ergonomic chair, desk, and monitor positioned at eye level. Avoid working from beds, sofas, or layouts with insufficient back support.

5.2 Ergonomic Assessment Process

Employees experiencing physical discomfort or requiring ergonomic adjustments may request a virtual workspace evaluation by the Health & Safety team. Approved adjustments may qualify for additional equipment funding under the wellness program.

5.3 Table of Workspace Ergonomic Standards & Allowances

Furniture / Equipment Item	Recommended Standard	Reimbursement Status	Maximum Cap (INR)
Ergonomic Office Chair	Adjustable height, lumbar support, 3D armrests	Eligible under One-time Stipend	12,000 INR
Adjustable Working Desk	Min width 120cm, stable frame (standing optional)	Eligible under One-time Stipend	10,000 INR

Monitor Arm / Stand	Eye-level viewing angle adjustment	Eligible under One-time Stipend	3,000 INR
Ergonomic Keyboard & Mouse	Split keys, vertical wrist support	Eligible under One-time Stipend	5,000 INR

6. Communication Guidelines & SLAs

6.1 Tool Usage & Availability

Our primary collaboration tools are Slack, Google Workspace, and Jira. Hybrid and Remote employees are expected to maintain active presence indicators and keep calendars updated during standard core business hours.

6.2 Meeting Etiquette

For all internal syncs and client reviews, video-on is highly encouraged to facilitate visual engagement. Use appropriate virtual backgrounds and ensure noise-canceling headsets are used in loud environments.

6.3 Table of Communication SLAs by Channel

Communication Channel	Nature of Query / Task	Expected Response SLA	Escalation Path
Slack (Direct Messages)	Ad-hoc questions, quick syncs	Within 2 Hours (during Core Hours)	N/A
Slack (Incident Channels)	Critical bugs, production issues	Immediate (Within 15 Minutes)	Department Head call
Email (Internal)	Status updates, general reports	Within 24 Hours	Slack DM reminder

Jira Ticket Updates	Task assignments, code reviews	Within 1 Business Day	Weekly Stand-up sync
---------------------	--------------------------------	-----------------------	----------------------

7. Expense Reimbursements & Internet Subsidies

7.1 Internet Subsidy Eligibility

To support high-speed connectivity, the monthly internet allowance is provided to cover broadband bills. Employees must submit broadband invoices showing a minimum connection speed of 50 Mbps under their registered name to claim the monthly reimbursement.

7.2 Non-reimbursable Home Expenses

Operating costs like residential electricity, water, home repairs, heating, or personal mobile phone bills are not covered under the remote policy and are considered private employee expenses.

8. Data Protection & GDPR/ISO 27001 Compliance

8.1 Device Security & Encryption

All corporate laptops must have BitLocker or FileVault active. USB mass storage devices are blocked by default. Hard copies of documents containing customer or product metadata must be shredded immediately after use and never stored at home.

8.2 Incident Reporting for Lost Assets

In the event of a laptop theft, loss of access card, or suspicious software warnings on remote devices, the employee must report the incident to security@techvflash.com within 1 hour to initiate remote wipe sequences.

9. Business Travel for Remote Employees

9.1 Mandatory Travel Cycles

Fully Remote employees are required to travel to the Pune HQ for team-building, product planning reviews, or company events up to 4 times a year. Travel, accommodation, and food costs are fully covered by the corporate travel desk.

9.2 Travel Booking Timelines

To optimize cost structures, travel bookings must be initiated through the internal travel portal at least 21 days in advance for domestic flights. Last-minute bookings require written approval from the HOD.

9.3 Table of Travel Reimbursement Slabs

Expense Category	Standard Provision / Limit	Required Approvals	Receipts & Verification
Domestic Flights	Economy Class (Lowest Logical Fare)	Manager Pre-approval	Boarding Pass & Invoice
Hotel Stay	3-Star / Corporate Partner Tie-up	Travel Desk Booking	Hotel GST Invoice
Daily Meal Allowance	Up to 1,500 INR per day	Standard Expense Claim	Individual food receipts

Local Commute	Uber/Ola Corporate rides or local taxi	Standard Expense Claim	App receipt or manual bill
---------------	--	---------------------------	-------------------------------

10. Performance & Productivity Management

10.1 Key Performance Indicators (KPIs)

Remote productivity is evaluated based on output quality, task completion velocity, and meeting SLAs, rather than minutes active on screen. Activity tracking or keystroke monitoring softwares are not used at TechV-Flash.

10.2 Review of Hybrid / Remote Status

If an employee's performance rating falls below expectations (Rating < 3.0), the company reserves the right to suspend Remote status and require the employee to work from the Pune HQ full-time for structured coaching.

11. Workplace Health Safety (Home Safety Assessment)

11.1 Safety Checklist

Employees working from home must complete a self-assessment checklist annually. This includes confirming proper electrical grounding, absence of trailing cables across walkways, adequate ventilation, and working smoke detection systems.

11.2 Liability Boundaries

TechV-Flash's worker safety liability is strictly confined to injuries occurring during standard work hours inside the designated home office workspace. Injuries arising from general household activities are not covered by workplace injury insurance.
